

## Resolution of the Master Divers at the FINA World Championships 2010

We the undersigned understand that the FINA World Masters Championships is recognized as the premier event of diving calendar and we appreciate the hard work of the FINA Bureau in its organization. However, we feel that using facilities, which do not conform to FINA rules devalues the championships in the eyes of the participants. We want to see an increase in participation in the Championships and if the facilities are not appropriate to a World Championships event this is going to prove difficult and indeed there could be a move towards the World Masters Games.

We recognize the difficulty in finding venues suitable for all the disciplines but in the interests of safety and enjoyment we wish to put forward a suggestion. Where the facilities at the main venue are suitable (2x1m springboard, 2x3m springboard, ~~1x3m platform~~, 1x5m platform, 1x7.5m platform, 1x 10m platform), we are delighted to share the venue with the swimmers. However, as in Gothenburg, where this is not the case, we would ask that the FINA bureau refer back to the successful bidding country to find an alternative venue within that country and in the unlikely event that this is not possible in another country.

The event in Gothenburg has been well organized and the hard work of the organizing committee is to be congratulated. We want to make future events even better and would be most grateful if you could take our comments into consideration. We thank you in anticipation of your assistance.

Gothenburg, 30<sup>th</sup> July 2010
